RESEARCH EMPLOYMENT

Imperial College London, London, UK <i>Research Fellow - Imperial Centre for Energy Policy and Technology (ICEPT)</i> • Leading researcher on techno-economic and policy analysis of solar technologies	2013 – present
Bocconi University, Milan, Italy <i>Research Fellow, GREEN, Centre for Research on Geography, Resources, Environment, Energy & Networks</i> • Research on energy economics and policy, distributed generation and grid integration, innovative business models and financing for energy investments	2014 – present
Collegio Carlo Alberto, Università degli studi di Torino <i>Research Fellow, Department Economics Cognetti de Martiis</i> • Coordination of research activities of Turin Centre for Emerging Economies (OEEET) • Research on the nexus energy access (rural electrification) and food security	2018 – 2019
Imperial College London, London, UK <i>Research Associate - Imperial Centre for Energy Policy and Technology (ICEPT)</i> • Working on several energy research projects (see below for more details) • Initiating and working on Seed Funding activities • Leading researcher on socio and techno-economic analysis of solar technologies	2011 – 2012
University of Edinburgh/Imperial College London, UK <i>Research Associate</i> • Managed the techno and socio-economic Work Package of PV Supergen Consortium PV21	2009 - 2011

RESEARCH PROJECTS COORDINATION

EU Commission – H2020 Project COMETS project: "Collective action Models for Energy Transition and Social Innovation" (COMETS). Co-Investigator of research consortium made of six EU country members studying the role and contribution of citizen-driven Collective Action initiatives (e.g. energy communities, cooperatives, purchasing groups) to the EU energy transition. The project maps CAIs across EU, quantifies their	2019 – 2022
---	--------------------

aggregate contribution to energy transition, and develops indicators for their assessment as well as in-depth case studies and best practice.

Euroheat & Power (European Association for district heating)

2018

"The use of crowdfunding as novel financial tool for district heating investment" study commissioned under H2020 project TEMPO (Temperature Optimisation for Low Temperature District Heating across Europe).

Forum per la Finanza Sostenibile

2017

Study exploring the role of crowdfunding in the context of sustainable finance.

Kantor Management Group - EU Commission

2017 – 2018

"Building Solar PV Study – High Quality Studies to Support the activities under the Eastern Partnership (HiQStep)". Project Objectives:

- Present EU policies, rules, regulations, tools and schemes of the promotion of solar panels on buildings
- To assess existing policies, rules, regulations and tools towards promotion of solar panels on buildings in the six Eastern Partner countries;
- To develop cost-benefit analysis for the staged development of building PVs in all Eastern Partner countries;
- To formulate recommendations on how to enhance PV penetration in the six Eastern Partners (Armenia, Azerbaijan, Belarus, Georgia, Moldova, Ukraine);
- To quantify the impact of building PV penetration to the overall energy mix and on the energy security of each country and to quantify the impact of PV generated energy to greenhouse gas emission reduction.

ANCI Emilia Romagna - EU IEE project SmartReFlex

2016

"Strumenti finanziari innovativi per impianti a fonti energetiche rinnovabili con focus su piccole reti di teleriscaldamento": study of innovative financing schemes for investments in district heating.

UK Research Council - EPSRC

2017- 2021

"JUICE Project", Joint UK India Clean Energy Centre: UK-India research consortium aiming at solving the integration of intermittent renewable energy for grid and isolated communities in India and UK with a view to grid connectivity. Co-Investigator of work package studying:

- development of scenarios for future PV, storage and smart technologies deployment and assess their grid integration implications;
- optimization of storage and smart technologies operation to maximise contribution and value of PV generation within the electricity grid;
- assessment of the economics and business models for their deployment; analysis of regulatory and policy conditions for successful implementation.
- modelling (sizing, costing and environmental impacts) and socio-economic assessment of micro-grid implementation for rural electrification (India)

UNDP (United Nation Development Programme) CEDRO Exchange

2015

"Crowdfunding and the energy sector", research project exploring the use of crowdfunding in the energy sector.

EU Commission - Marie Curie Intra-European Fellowship

2014 – 2016

'LocalEnergy': Investigation of emerging business models for implementation of energy efficiency and renewable, with a particular focus on community and shared ownership approaches.

- Emerging and innovative business models for the deployment of renewable energy and energy efficiency, with a focus on community energy and shared ownership approaches.
- Study of crowdfunding as innovative and potentially disruptive alternative finance tool and its application to the energy sector.

UK Research Council - EPSRC

2013 – 2016

"PV2025 Project": Potential Costs and Benefits of Photovoltaics for UK-Infrastructure and Society: academic consortium to explore potential and implication of high penetration of PV in the UK energy system. Co-Investigator of work package studying:

- Spatially disaggregated PV scenarios to assess PV deployment and potential in UK

- Spatially disaggregated assessment of impact of PV generation to the UK electricity grid
- Analysis of feasibility and conditions for implementation of storage technologies to mitigate impact.

ESRC-SSRC Collaborative Visiting Fellowship, Brazil

2009

Visiting the following departments:

- Energy Planning Engineering department (PPE) at Alberto Luiz de Coimbra Graduate School and Research in Engineering (COPPE), Federal University of Rio de Janeiro (UFRJ)
- LABSOLAR, Solar Research Laboratory, and LabEEE, Laboratorio de Eficiencia Energetica em Edificacoes, both at University of Santa Caterina (UFSC), Florianopolis

RESEARCH PROJECTS PARTECIPATION

UK National Grid

2012- 2013

Research project to review of evidence and methodologies for Impact Assessment of socioeconomic impacts of gas transportation and electricity transmission infrastructure. Coordinated by Dr Rob Gross.

Imperial College London – Pathway to Impact Project, UK

2012 – 2013

"The potential of photovoltaic technologies for rural electrification and carbon emissions mitigation in developing countries": Evaluation of the potential of emerging novel PV technologies to accelerated PV deployment in developing countries, with focus on India. Coordinated by Prof Jenny Nelson.

Imperial College London – EPSRC funded project, UK

2012 – 2013

"Transformation of Top and Tail of Energy Networks": Imperial College led collaborative project of 8 Universities funded by the EPSRC Grand Challenge Programme, focusing on the physical infrastructure change in energy networks required to move the UK to a low carbon economy, and achieve the Government's 2050 reduction in CO2 emissions target. Coordinated by Dr Rob Gross.

Imperial College London – WWF UK

2012

"On picking winners": Analysis and discussion of implementation of carbon tax versus target support to renewables in a portfolio of energy policies. Coordinated by Dr Rob Gross.

UK Energy Research Centre (UKERC), TPA

2011 - 2012

"Electricity Cost Estimates Methodologies": Technology and Policy Assessment (TPA) project for the assessment of methodologies employed in estimating future costs in the UK electricity generation sector and of generation technologies' cost reduction potential. Coordinated by Dr Rob Gross.

Intelligence Energy Europe (IEE), EU Commission

2009 – 2011

"BioSolEsco": exploring potential of biomass and solar heating in public and private buildings via the energy services approach. Coordinated by Dr Marco Pantaleo.

UK Research Council - EPSRC

2009-2011

"PV Supergen (PV21)": academic and industrial consortium developing and testing innovative thin film PV technologies. Managed the Techno-economic Work Package, coordinated by Dr Mark Winskel and Dr Rob Gross.

- Investigated PV technologies innovation and cost reduction potential
- Investigated PV materials scarcity, supply chain bottlenecks and implications for PV future development
- Parametric modelling of PV technologies production costs, assessment of drivers for cost reductions and impact of materials costs.

Energy Research Centre (UKERC), UK

2008 - 2009

"Energy 2050": integrated assessment of how the UK can move to a resilient ('secure') and low-carbon energy system over the period to 2050. Coordinated by Prof Jim Skea.

- Responsible for the photovoltaics "Advanced Technological Development" scenarios and analysis
- Markal energy system model – data development and scenarios analysis and results analysis.

Energy Research Centre (UKERC), London, UK

2008 - 2009

"Energy Technology Learning Rates and Learning Effects": Analysis of innovation processes (or 'learning effects') for emerging energy supply technologies and the representation of these processes in 'learning rates'. Coordinated by Dr Mark Winskel.

E.ON UK – EPSRC Partnership 2007
Contributed to scoping of the project "Pathways for a utility to a low-carbon energy system".

Energy Institute, London, UK 2006
Contributed to submission to the Government Energy Strategy Consultation (2006).

FUNDING ID

- **2019-2022** - H2020 project, COllective action Models for Energy Transition and Social Innovation (COMETS), Call: H2020-LC-SC3-2018-2019-2020 (BUILDING A LOW-CARBON, CLIMATE RESILIENT FUTURE: SECURE, CLEAN AND EFFICIENT ENERGY). Topic: LC-SC3-CC-1-2018-2019-2020. Budget awarded: €170k out of a total €3000k.
- **2017-2021** - Joint UK India Clean Energy Centre (JUICE) project, budget awarded ~£250,000 out of total ~£2ml.
- **2018** - Study for Euroheat & Power (European Association for district heating), funding €14,000
- **2017** - Building Solar PV project for Kantor Management Group - EU Commission (2017-2018), funding €20,000
- **2013-2016** - Potential Costs and Benefits of Photovoltaics for UK-Infrastructure and Society (PV2025) project, budget awarded ~£190,000 out of total of £1ml.
- **2016** - Study for ANCI Emilia Romagna - EU IEE project SmartReFlex (2015), funding ~€4,000
- **2015** - Study for UNDP (United Nation Development Programme) CEDRO Exchange, funding €1,000
- **2014-2016** - Awarded EU Marie Curie Intra-European Fellowship (for total funds of €180k)
- **2009** - ESRC-SSRC Collaborative Visiting Fellowship, Brazil, ~£5,000

HONORS AND AWARDS - PROFESSIONAL MEMBERSHIPS

- Invited Member of the World Bank Group Global Influencer Barometer Panel, 2021
- Invited guest editor of Applied Energy Journal special issue 'Sustainable Supply Chains and Energy Security', 2013
- Advisor of PRIMAL renewable energies Lda, clean energy start-up, 2012, UK-Portugal
- Article "*Implications for CdTe and CIGS technologies production costs of indium and tellurium scarcity*" invited for publication to Progress in Photovoltaics (impact factor 6.4) after being selected among the 20 highest scored abstracts of the 26th European Photovoltaic Solar Energy Conference (EUPVSEC), Sept 2011, Hamburg. EUPVSEC is one of the largest annual academic conferences in the solar energy field with more than 4000 delegates.
- Invited to Britain's first ever renewable energy mission to Israel (Organised by British Embassy and KTN) and attended Eilat-Eilot Renewable Energy Conference and Exhibition, 2011
- Article "*Conditions for photovoltaics deployment in the UK: the role of policy and technical developments*" featured in the top 5 list of downloaded articles in 2010. Invited paper for publication on Journal of Power and Energy at the conference 'Sustainable Energy UK: Meeting the science and engineering challenge', UKERC Meeting Place, May 2008.
- Awarded ESRC-SSRC Visiting Fellowship, 2009
- Awarded UK Energy Research Centre (UKERC) interdisciplinary PhD scholarship, 2005
- Awarded University of Padova (Italy) scholarship to attend MSc Economics, 2001
- **Memberships:** EFElab, UK Solar Energy Society (UK-ISES), Imperial Solar Network, British Institute of Energy Economics (BIEE), Hawthorn Club (network for professional women in energy industry), Imperial College Brazilian Forum, European Energy Research Alliance (EERA) Socio-

TEACHING AND SUPERVISION

- Supervised PhD and MSc projects from MSc Environmental Technology (Centre for Environmental Policy) and MSc Sustainable Energy Futures (Energy Future Lab) at Imperial College London, (2009/2010, 2010/2011, 2011/2012, 2012/2013, 2014/2015, 2016/2017, 2017/2018, 2018/2019, 2019/2020)
- Supervised MSc projects from MaGER (Master in Green Management, Energy and Corporate Social Responsibility) at Bocconi University (2015-2016)
- Lectured at Project Management and Funding of International Programs, Bocconi University, May 2017
- Lectured at Energy Economics course, BSc course of Environmental and food economics, Universita' Statale, Milan (2015)
- Lectured on 'Crowdfunding: innovative tool to finance local RES projects?' at Advanced Training Course: Integration of renewable in the Mediterranean electricity market, organized by RES4MED, Polytechnic Milan, 25th November 2014
- Lectured on 'Photovoltaics technology, economics and policy' at MSc Environmental Technology, Centre for Environmental Policy, Imperial College London, 2011/2012, 2012/2013, 2013/2014
- Given small group seminars within Energy Policy option of MSc Environmental Technology (Centre for Environmental Policy), Imperial College London, 2010/2011 – 2011/2012, 2012/2013
- Given small group seminar to Laing O'Rourke MSc Systems Engineering & Innovation, Department Civil and Environmental Engineering, Imperial College London, 2011/2012
- Lectured on 'Renewables in developing countries' at MSc Environmental development, School of Environment and Development, University of Manchester, 2007/2008

OTHER PROFESSIONAL EXPERIENCE

Consultant – Energy Economist **2016 – to date**
Offering consultancy in the energy economics field to national and international public institutions and companies

Ecomill s.r.l., Milan Italy **2014 – present**
Founder
Ecomill is the equity crowdfunding platform authorised by Consob (Italian Financial Authority) focusing on projects in energy and impact investing

Erculea Resine S.p.a., Cosenza, Italy **2006 – 2011**
Family business producing plastic pipes

DEFRA (Department for Environment Food & Rural Affairs), London, UK **2003 - 2005**
Economist - Environment Policy Economics Division
Developing economic analysis and advice to support Environmental Policy Divisions

1. Climate change branch

- *International climate change issue:* provided economic advice, analysis and support into the post-2012 negotiation and EU climate policy; modelling domestic and international climate change policy
- *Domestic climate change policy:* Appraised and evaluated domestic climate change policy, in particular cost-benefit analysis of EU f-gases regulation and Ozone Depleting Substances EU regulation infringement
- Provided support and economic analysis to Social Cost of Carbon study (*Valuation of climate change damage*) – including organization of experts meetings and workshops

2. Air quality, Chemicals and Pesticides branch

- Worked on the cost-benefit analysis of the proposed European Chemicals Strategy (REACH) and other aspects of chemicals policy
- Provided economic analysis of Pesticides Tax proposal – international review of pesticide taxes, cost-benefit analysis of pesticides use
- Worked on evaluation and assessment of Air Quality Strategy Review

Caboto Holding SIM - asset management firm, Milan Italy 2000 - 2001
Economist – Economic Analysis Department
Provided micro and macro-economic analysis to support trading activities

UNDP (United Nation Development Program - UNDP), Karakol, Kyrgyzstan 2000
Intern - Project Implementation Unit of the Poverty alleviation Program
Assessed impact of UNDP Program on target communities (in terms of infrastructures, sanitation, economic performance, level of income poverty) and potential scaling-up
• Collected and analysed data through questionnaires, visits and workshops in target communities and villages

Projects and project writing

ISIGROWTH (Horizon 2020, RIA, 2015-2018): I developed a multi-country simulation model to study heterogeneous growth patterns in the world economy. Also, I took part to the coordination of activities (e.g. organizing meetings, managing project website).

GROWINPRO (Horizon 2020, RIA, 2019-ongoing): I actively participated to project writing. I am involved in different research tasks including: (i) the study of industrial and trade policies and their impact on technological catch up of laggard countries using a multi-country simulation model; (ii) the estimation of short- and long-run effects of mission-oriented research projects. I am also contributing to organizational activities (e.g. project meetings, organization of the working paper series).

RESEARCH GRANTS

- Zhejiang Soft Science Key Project (2021-2022), Grant agreement no. 2021C25025, 100,000 Chinese yuan, project member.

The project entitled "The Drivers of Original Innovation in China and Zhejiang Province" is directed by Dr. Zhijing Zhu and funded by the People's Government of Zhejiang Province. We currently explore the relationship between global value chain participation and innovation catch-up in China.

- LUISS internal research fund (2020-2021), 4500 euro, fund holder.

I have been awarded the internal research fund by LUISS. This fund has been granted based on internal evaluation.

- H2020 GROWINPRO project (2019-2022), Grant agreement no. 822781, project member.

The project is funded by the European Union Horizon 2020 Research and Innovation programme and directed by Prof. Andrea Roventini. I undertake scientific research activities related to some of the working packages of the whole project, including investigating the microeconomics of the drivers and effects of productivity change. I have participated in the kick-off meeting of the project. Several papers have been published in academic journals as the research delivery for the project. My research found important empirical evidences of the wage-productivity nexus for China's manufacturing firms, that offers both the stylized facts for developing the theoretical models and the comparative evidences from one of the major economies to that of the EU countries. I have been actively participating in academic conferences worldwide for disseminating the research results from the project.

- ORSS Fund (2017-2020) granted 30,000 Chinese yuan/year (3,800 euro/year), fund holder.

I have been awarded the ORSS (Outstanding Research Supporting System) fund by Nottingham Business School China. This fund has been granted based on some competitive selection procedures. I was the fund owner. I have been using this fund to hire research assistant and go to academic conferences.

- H2020 ISIGROWTH project (2015-2018), Grant agreement no. 649186, project member.

The project is funded by the European Union Horizon 2020 Research and Innovation programme and directed by Prof. Giovanni Dosi. I undertook scientific research activities related to some of the working packages of the whole project, including analyzing the globalization of production and finance and de-industrialization from a comparative perspective. Several papers have been published in academic journals as the research delivery for the project. My research investigates

the roles of product and process innovation in employment dynamics, and searches for the drivers of the persistent-high-growth firms in China's manufacturing. These findings offer novel stylized facts from one major emerging economy in the world as comparative evidences. I have been actively participating in academic conferences globally for disseminating the research results from the project.
